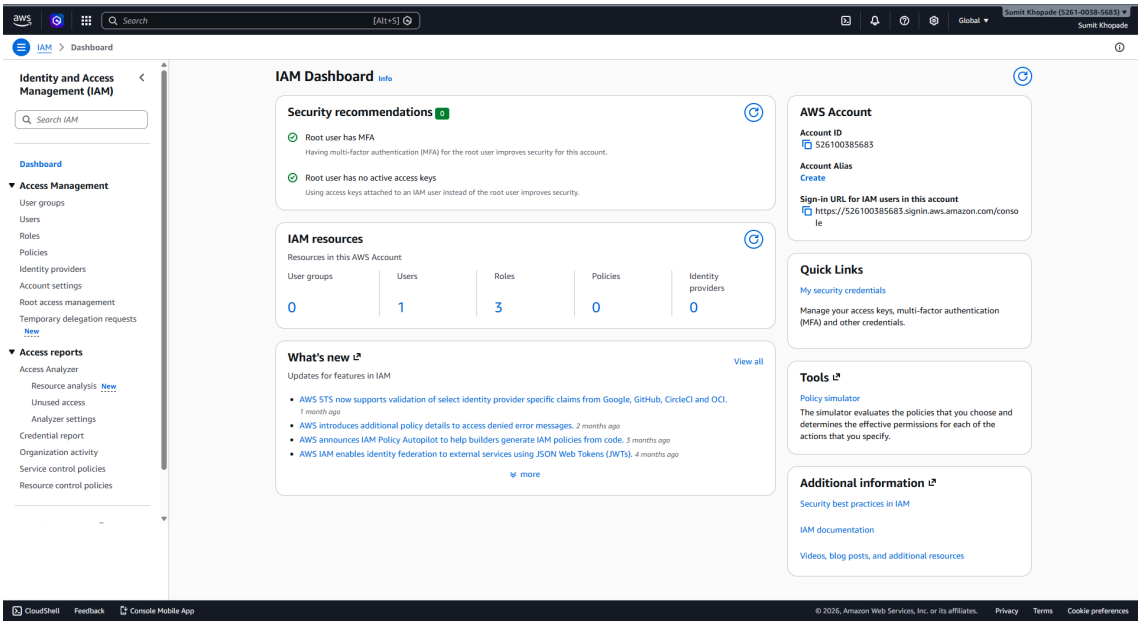
🔷 Step 2: Open IAM Service

1. In search bar → type **IAM**

2. Click on **IAM (Identity and Access Management)**



🔹 Step 3: Create IAM User

1. Click **Users** (left side)

2. Click **Create user**

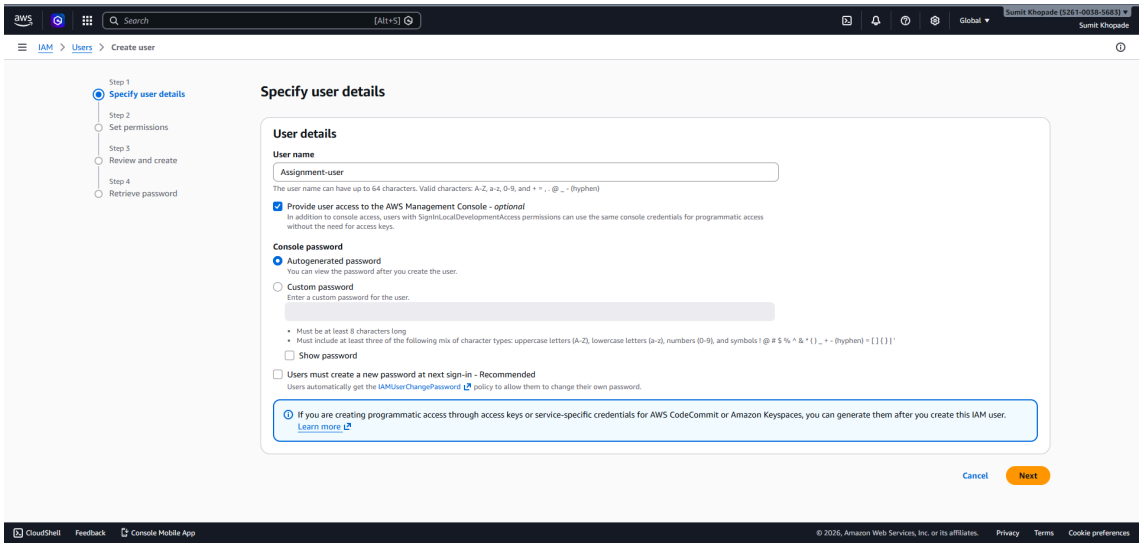
Enter details:

- **User name** → e.g. `assignment-user`

- Tick:
  - ✅ Provide user access to AWS Management Console (if needed)

3. Set password:
   - Auto-generated OR custom

👉 Click **Next**



🔷 Step 4: Set Permissions

Select:

👉 **Attach policies directly**

✅ A) Add S3 Full Access

1. In search box → type:

   S3

2. Select:

   - ✅ **AmazonS3FullAccess**

✅ B) Add EC2 Read-Only Access

1. In search box → type:

   EC2

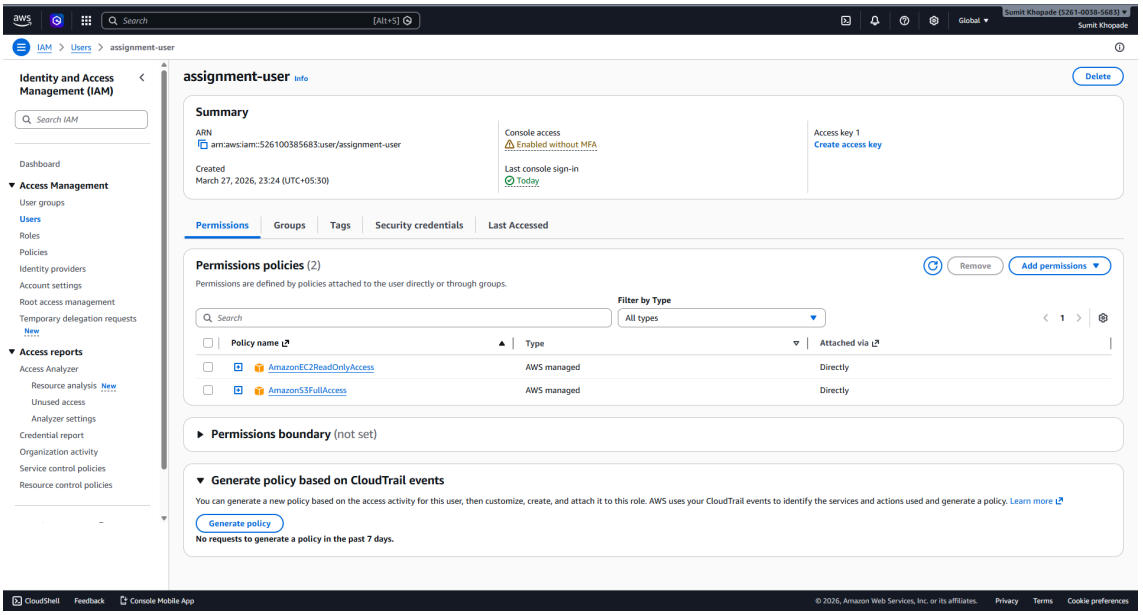
2. Select:

   - ✅ **AmazonEC2ReadOnlyAccess**

👉 Now click **Next**

🔷 Step 5: Review & Create

1. Review selected permissions:
    - AmazonS3FullAccess ✅
    - AmazonEC2ReadOnlyAccess ✅
2. Click **Create user**



🔷 Step 6: Save Credentials

(IMPORTANT ⚠️)

- Download `.csv` file OR
- Copy:
    - Username
    - Password
    - Login URL

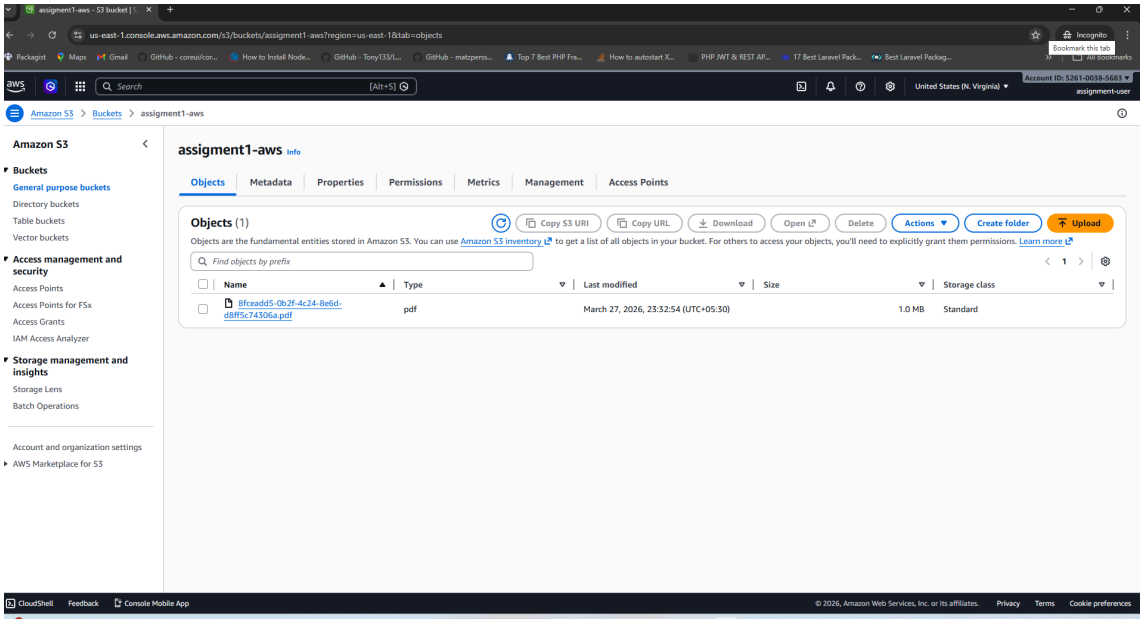
🔹 Step 7: Verify Permissions

Login using IAM user:

Test S3:

- Go to S3 → You should:
    - ✅ Create bucket

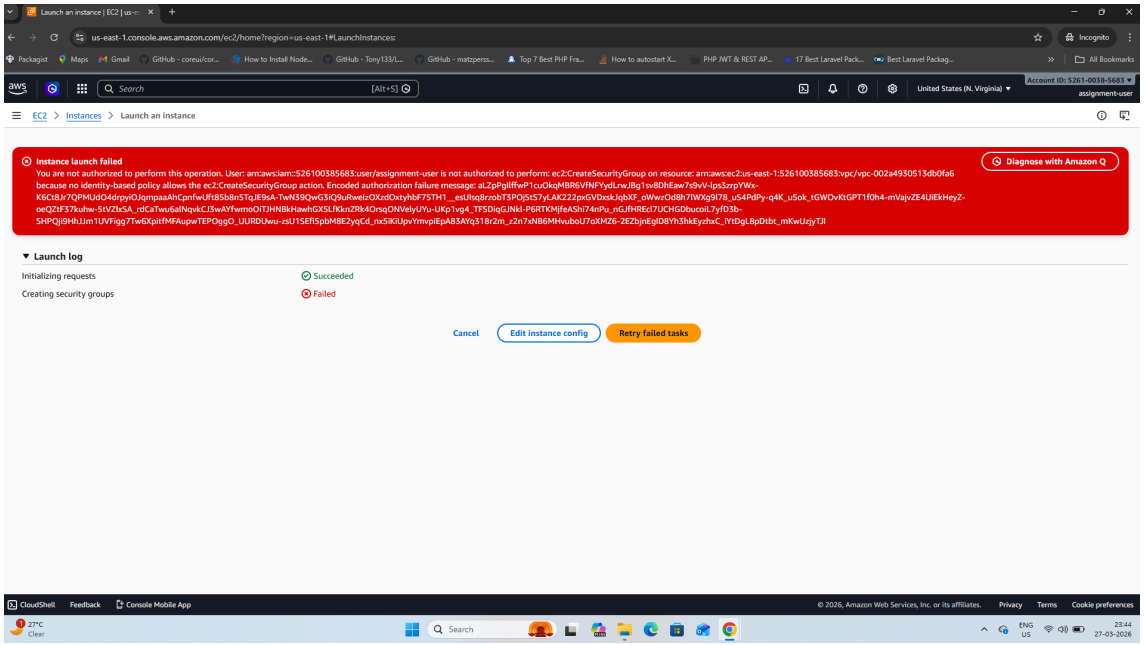
- ✅ Upload files



Test EC2:

- Go to EC2 → Instances
  - ✅ Can view instances

- ❌ Cannot create/terminate (read-only)



Conclusion

Successfully implemented IAM policies with correct permission boundaries. S3 full access works and EC2 access is restricted as expected.
